BO-KAY TOMATO

Our Very Newest Introduction

Picture on Front Cover

We believe that Bo-Kay will supplant, the Great Bonny Best and Red Head. As a second early it has all the good qualities of both with much more added, has a richer color, is wilt resistant, free from checks and cracks, is a heavy cropper, grows in clusters like a Bokay (where it gets its name), is fine for greenhouse and outdoor staking. Our estimation of this variety is, that it is much better color than Break O'Day, maturing a few days later. We believe it will produce more number one grades than any other tomato. Good for greenhouse and outside stakes. **1 oz., $1.00; ¼ lb., $3.50; 1 lb., $10.00.**

TOMATO

SCARLET DAWN—This wonderful tomato was first introduced in 1934, and when all reports were in from the most important tomato growing sections, it received the All American Gold Medal, but little of the seed was available for large plantings. Yet, the reports from all of our trials were so flattering, notwithstanding the handicaps of the season, we do endorse the new variety with much enthusiasm. A cross between Clark's Earliest and Marglobe, vines of medium growth, fairly open, very prolific, fruits medium, large with thick wall. Smooth, free from flat sides, bright scarlet ripening well to the stem. It is more globe shaped than the John Baer and 3 to 4 days earlier than this variety and a fine type for greenhouse growing, as well as for a field staked tomato. **1 oz., 75c; ¼ lb., $2.50; 1 lb., $9.00.**

To Our Friends and Customers

IN ALL COMMERCIAL ACTIVITIES a reputation for trustworthiness is the most valuable of assets, but for the seedsman it is absolutely indispensable. Your success, in great measure, depends upon the quality of the seeds you plant and your complete satisfaction is of the greatest importance to us.

For over 30 years we have been dealing with the critical commercial vegetable growers, who are planting and raising vegetables, with the expectation of making a profit.

We make every effort to faithfully supply the best seeds obtainable as to quality and vitality. Your order commands intelligent handling, the knowledge from long experience and efficient service.

IMPORTANT INFORMATION

HOW TO ORDER

Please sign your name, post office, county and state on every letter sent to us. You may remit at our risk by Post Office Money Order, Check, Draft, Express Order, Cash, Stamps or by Registered Letter. We guarantee safe and prompt delivery whether sent by mail, express or freight.

HOW SEEDS ARE SHIPPED

Prices quoted in this List include transportation charges except on potatoes, field seeds, feed, berry boxes, baskets, plants, insecticides, fertilizers and implements, which will be shipped at buyer's expense.

In ordering please mention whether wanted by mail, express or freight.

Berry Boxes and Fruit Baskets at Market Prices.

TERMS

Cash with all orders. We make no charge for boxes, bags, packing or drayage on garden seed.

All prices quoted in this list are subject to market fluctuations or prior sale.

Discounts—On orders of vegetable seeds listed in this Price List we offer the following discount for cash:

$10.00 and over—10 per cent.

We guarantee safe and prompt delivery on every order.

GUARANTEE

We buy and sell THE BEST SEEDS THAT GROW. But it is impractical to guarantee seeds, as the best seeds will fail under improper treatment. Some may be sown in too dry ground or too wet, too deep or too shallow. Some hardy seeds stand cold weather and will grow where the soil is too cold for others and would cause them to decay. Insects may attack and destroy them. For these reasons we give no warranty, express or implied, as to description, quality, or any other matter of any seeds, bulbs or plants we send out and we will not be in any way responsible for the crops. If the purchaser does not accept the goods on these terms, they are at once to be returned.

Without good seeds it is impossible to produce good crops. Our aim is to supply only the highest possible quality produced. You cannot buy better seeds no matter what you pay.

Field seed prices are all subject to change without notice. Write for samples and special prices on your field seed requirements. We will save you money.

BEET

OUR NEW MATCHLESS BEET

OUR NEW MATCHLESS BEET is a fine globe shape variety for early bunching, as well as for main crop. There is no beet that is its equal in quality and fine appearance. In fact, it is perfect in every way. It is as early as the finest strains of beets known to us in our long experience of thirty years' dealing with the critical market gardeners. It is superior in shape and color with the extra advantage that its foliage is lighter green in color. The bulbs have small tap root, are smooth and much darker in color than most globe beets, both in and out. The flesh is rich, deep brilliant scarlet red without light zones, always sweet and tender. Matchless is an all-purpose beet, but especially fine to growers catering to trade who demand quality and appearance.

MUSKMELON

HALE'S BEST SPECIAL—Days to maturity, 70-72. Hale's Best, sometimes spoken of as Early Imperial, because it will give you a ten-day leeway over your neighboring competition, will no doubt be your most profitable Cantaloupe. It is ten days earlier than other Rocky Ford types, and brings the high prices. If you are a grower and shipper of Cantaloupes, we can give you no better advice than to plant Hale's Best on a large acreage this year. The Imperial Valley Cantaloupe growers, the keenest group of men in the industry, have been growing an increasingly large acreage of it for the past four years. Last season saw approximately 20,000 acres planted to Hale's Best in California, with a very decided falling off in its favor of the well-known 10-25, the Cantaloupe that made the Imperial Valley famous.

NUMBER 36

This wonderful variety was bred out of the Selected Hale's Best and under ordinary conditions is ready for the market in 85 days from planting. Is truly a beautiful melon and has become very popular with the shippers the past season. It is heavily netted and ribless. The rich, spicy flavor of the flesh is fine grained, deep, juicy and sweet. We recommend this variety to melon growers everywhere.

CARROTS

Denver Danvers is a red, coreless carrot, is surely the last word in quality and appearance where the Danver type is satisfactory. It is best suited where Imperator does not satisfy, because of its length and is a perfect specimen where the longer type of Chantenay is in favor. The tops are very satisfactory for bunching. We strongly recommend this new addition to the critical planter where shape, length and color are so vital to the grower "who cares."

YELLOW RESISTANT STRAINS OF CABBAGE

In the years immediately following 1900, crop failures became more and more frequent in the cabbage growing sections of the middle West. Even on land where the crop had been grown only a relatively few times, growers were puzzled by the fact that the plants turned Yellow, leaves dropped off at the stem and plants died in large numbers. This occurred even when careful rotation of cabbage with other crops was practiced. Once this diseased condition appeared there seemed to be no effective cure or prevention by rotation, seed or soil treatment, and the only course left to pursue was to abandon such fields as "Cabbage sick." The varieties described below have proven their real worth in districts where it has been impossible to grow cabbage of the more common varieties in the past few years.

YELLOW RESISTANT EARLY GOLDEN ACRE, absolutely a new variety, which has been bred out of the Golden Acre, but has been entirely satisfactory in the last two years on our trial grounds. We have found it to be as early as the early strains of Copenhagen and yet as resistant as any of the other varieties of cabbage, which are bred with a thought of producing a crop on infested soils.

Our stock is limited on this variety and we would suggest that you place your orders early. Oz., $1.00; ¼ lb., $3.00.

The MARION MARKET was originally bred up from Copenhagen Market, but differs from the latter in several respects. It takes about ten days longer to mature than the early strains of Copenhagen and produces a much larger plant. The heads are practically round, very hardy and stand shipment well. The quality throughout is excellent, and a favorite for early Kraut. It is very highly resistant to the Yellows and we have seen this variety yield as high as 26 tons per acre.

BUGNER'S SHORT STEM, extremely popular wherever planted, our strain of seed is a production of the originators stock seed. This variety produces large, semi-round heads. It is disease resistant and will take trifle more space to grow than other varieties, should not be set closer than 2½ by 3 feet.

WISCONSIN No. 8, a yellows resistant strain of the Danish Ballhead, desirable for growing in sections infected with this disease. Plants are somewhat larger, more leafy and spreading than the Ballhead, but heads are fully as firm, compact and long keeping.

WISCONSIN ALL SEASON, a midseason variety, similar to All Seasons but resistant to Yellows. It is valuable for kraut or as a winter keeper.

GLOBE, a yellow resistant type of the well known Glory of Enkhuizen, having about the same size head as the Glory.

WATERMELON

KANSAS KING—This is truly the king of all the watermelons with which we are acquainted. When its wonderful qualities are analyzed, the vote is usually 100 per cent. Foremost, it is large, often ranging 60 pounds; it is early. One grower from Minnesota reports a sale of 82 deliciously ripe melons averaging 28 pounds each, 79 days from planting, and we have yet to receive a report of a melon with a hollow center from any of the growers, whether large or small. It is oval or round in shape; distinctly striped; rich, red flesh, unexcelled in sweetness with tan colored seeds.

BILL ROGERS—This melon, since it was introduced by us three years ago, has met with sales but a little short of a revelation to our growers, as its fine qualities have enthused every watermelon lover who has become acquainted with its sugary, juicy, rich, flavor. It is a smooth, round, oval-shaped melon with dark rind, and often weighing 50 pounds. Its tough rind makes a very desirable shipping melon. It is a few days earlier than the Stone Mountain, has a vigorous vine and is a heavy yielder; free from hollow center when ripe, seeds are white.

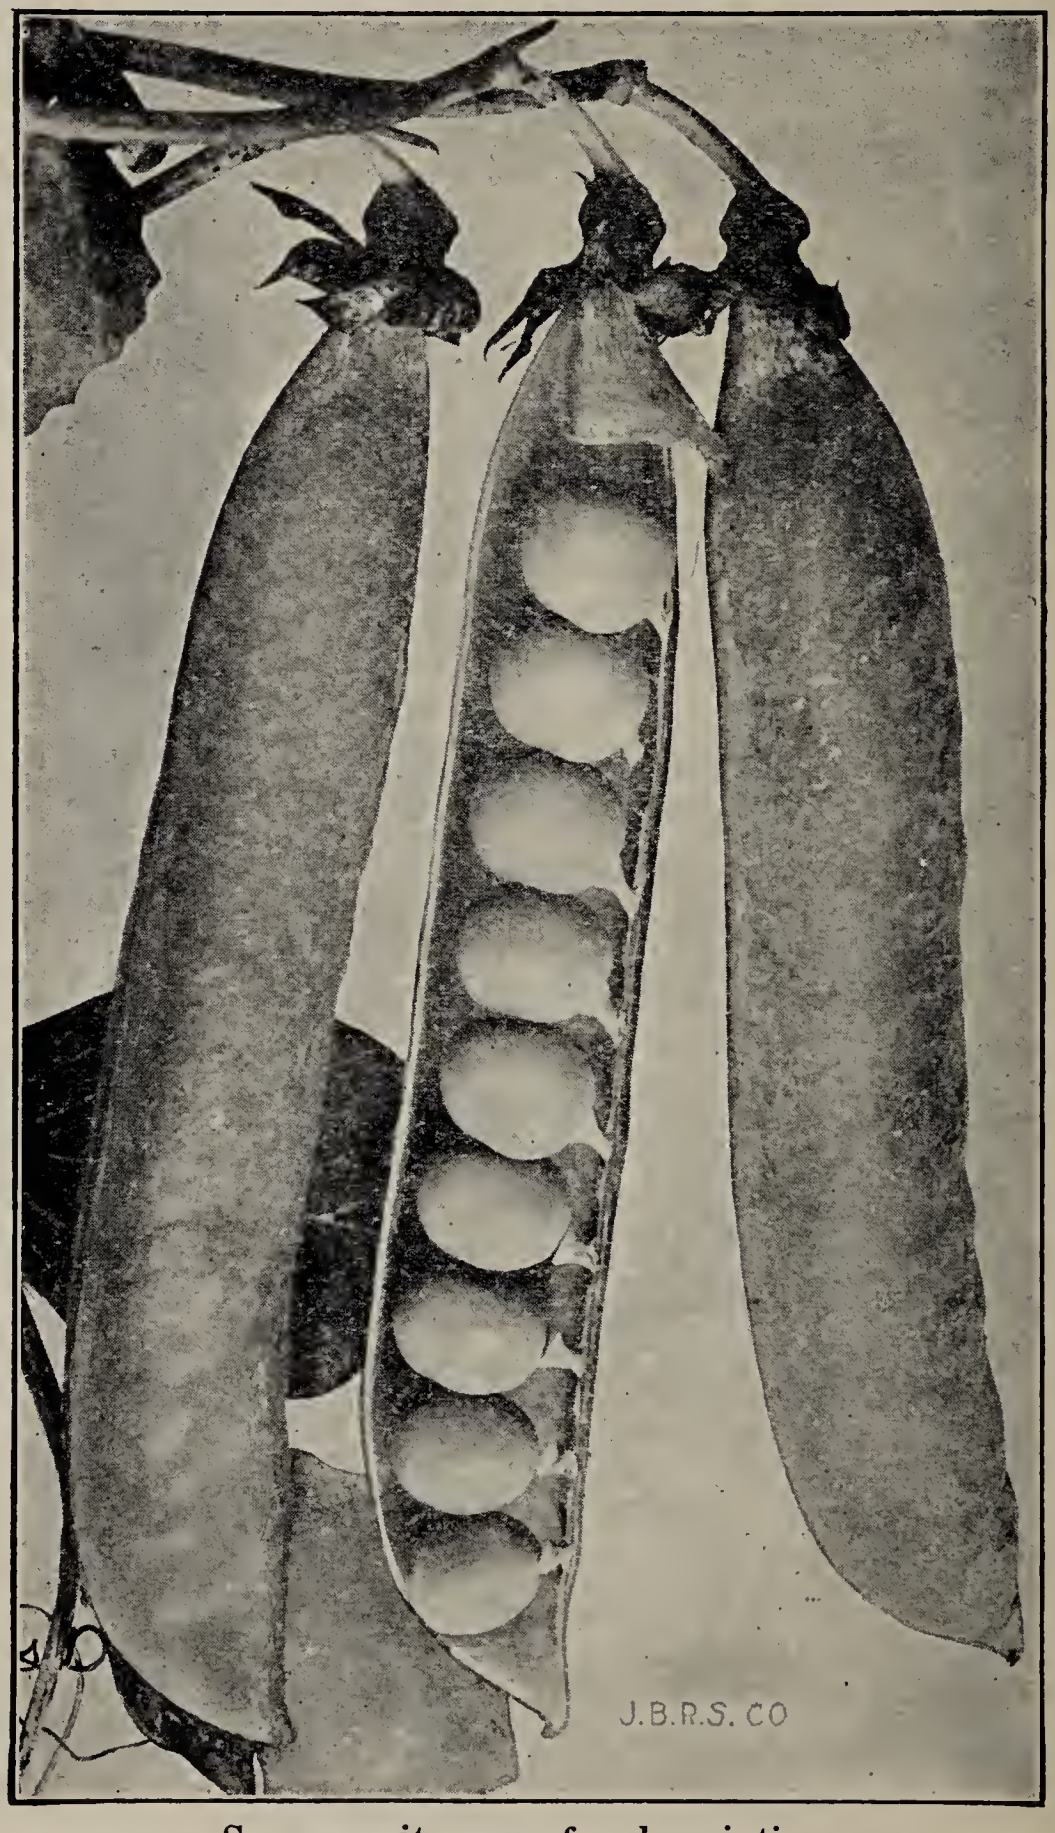
DIXIE QUEEN—This is not one of the more recent introductions, but stands alone with many of the praiseworthy of quality. It has wonderful keeping qualities, and is a good shipper. Fruits, medium; round to oval; light green striped; rind rather thin; very strong; flesh bright red, fine quality and a good flavor. Seeds small white; average weight about 40 pounds. 85 days from planting time to first pick.

SCHOCKLER—A large, main crop shipping variety, which found its origin in Texas. It is rather late for a successful crop North of the southern boundary of Minnesota. Fruits very long, large, with dark green rind; flesh, rich red and of fine quality. Its medium, thick rind adds to its shipping qualities; also, the rind is desirable for watermelon preserves.

STATE FAIR—This is a wilt resistant Stone Mountain, round in shape, having the same color rind as its parent, and bred for resistance to wilt, a common disease in so many sections the past two or three years. The flesh is deep red, firm and solid of heart; an unusually early solid melon, many attain a weight of 40 pounds; fine for roadside and store trade.

NEW WONDER—A new wilt resistant selection from the Kleckley's Sweet or Monte Christo variety. Its shape is long; dark green, thin rind; as early as the best strains of Kleckley's Sweet. Its deep red, crisp flesh is unequalled in quality; many melons attain a weight of 35 pounds. A good shipper, and an all round, good melon where soil conditions make it necessary to plant a resistant strain.

PEAS—Western Giant



See opposite page for description

PEAS

WESTERN GIANT—This truly is a giant podded pea of recent introduction. Its mammoth long, dark, green pods, 5½ to 6 inches long are slightly curved, the vines about 26 inches high, produce a bountiful crop about 73 days from planting. Unlike many varieties of its season, the quality is rich in flavor and will remain tender and sweet several days after picking. 1 lb., 35c; 5 lbs., $1.50; 10 lbs., $2.75; 100 lbs., $25.00.

LITTLE MARVEL—62 Days—Vine strong and vigorous, about 18 inches tall. Showy pods about 3 to 3½ inches long with a blunt end containing 7 or 8 Peas. Seed large, green, wrinkled. A very fine productive, dwarf, sturdy variety. Popular with the home gardener and in some sections planted largely by market gardeners.

LAXTON'S PROGRESS—A new variety of great merit and popularity. The pods are large, 4 to 4¼ inches long, and of a fine dark green color. Vines grow only 18 to 20 inches high, and bear a heavy crop of handsome pods. Being one of the earliest of the sweet wrinkled sorts, Laxton's Progress is in great demand everywhere. Matures in about 55 to 58 days.

LAXTON'S SUPERB OR EARLY BIRD — An exceptionally early, hardy, productive, handsome pea. Height 16 inches. Vine and foliage moderately heavy, medium green; pods deep green, 4 inches long, semi-broad, pointed and well filled with 8 to 9 very large, dark green peas. As early as Laxtonian and more productive; seed blue, semi-wrinkled; quality fair.

HUNDREDFOLD—This is, without doubt, the very best dwarf pea ever grown. It is the best-flavored and the largest-podded dwarf-growing sort in existence. It is ready about three days after the earliest sorts, and bears an enormous crop of handsome, intensely dark green, fairly broad and pointed pods, 4 inches long, containing about 8 large, dark green peas of excellent quality. The vines are 16 inches high, sturdy, and resist heat well.

THOMAS LAXTON—Days to maturity, 73. A variety having been originated in England by Mr. Thomas Laxton, of Bedford, a noted English horticulturist. This pea is hardy and slightly earlier than Gradus and a more abundant yielder. The pods resemble Gradus in shape, excepting that they are blunt ended. They will attain a length of four and one-quarter inches. They are straight, inclined toward roundness and are well filled. The vines will grow to a height of thirty inches.

BEANS

POLE AND BUSH

STRIPED SCOTIA OR CORNFIELD—A superb long green bean, succeeding better when planted in cornfield than any other variety. The handsome green pods average 8 or 9 beans to the pod, grow very uniform, about 6 inches long, thick meated, rich and buttery. It continues in bearing so long it might be called "Everbearing." Specially adapted to growing on corn, thus economizing space on valuable land, or where poles are scarce. Seed small-medium, kidney shaped, mottled putty color with dark striping. Ready for picking in 72 days.

KANSAS WONDER WHITE CORNFIELD—65 days. An early maturing, green-podded, white-seeded pole sort, desirable for snaps and unsurpassed in its class as green shell beans. The pods are round, very long, often 8 to 9 inches, irregular in shape and quite stringless.

DWARF OR BUSH LIMA BEANS

McCREA BUSH LIMA—A new lima with vines about the size of Fordhook, pods curved and about the size of Henderson's but much thicker, as the bean is of the potato type. The pods are borne very profusely with 3 to 5 very large, plump beans closely crowded in each pod. Although the pods are small, the size of the beans and their unusually fine flavor will make them popular with the market and home gardener.

BURPEE'S IMPROVED—Similar to Burpee's Bush Lima, but slightly earlier and longer podded. Plant large, erect, vigorous, very productive; pods contain 4 to 5 seeds. Dry beans large, plump, flat, surface somewhat wrinkled, color white with greenish tinge.

FORDHOOK—The one best Bush Lima. Outsells all others. The stiffly erect bushes branch freely and bear tremendous crops. It is ready for use quite early. The Beans are very fat, are closely packed in the pods, shell very easily and remain green a long time. Pods are borne in clusters of from four to six, average 4 to 5 inches long, and contain usually four tender beans of a delightful flavor.

CAULIFLOWER

WHITE MOUNTAIN—because of its unusual qualities and resistance has displaced nearly all of the other varieties wherein competition. A strong growing variety of the snowball type, produces larger and deeper heads and with no unusual growing hindrances will make very ample foliage with overlapping leaves over the head as a protection to the snow white heads in its forming. It is short stemmed and is not as "leggy" as many other types, matures with great uniformity and when tied comes on very rapidly and for this reason we advise the planter to transplant in the field in such quantities as he can handle to the best marketable advantage.

Nearly 100 per cent of White Mountain can be harvested within four months after sowing the seed. The white heads are great depth and pure white in color, it is very rare, green leaves appear in the head. Five years' experience prompts us to say that White Mountain will produce 25 to 30 per cent more number one marketable heads than most other varieties. White Mountain is in a class of its own and our statements are backed by the reports of our customers in Colorado, Michigan, Minnesota, Iowa and Illinois.

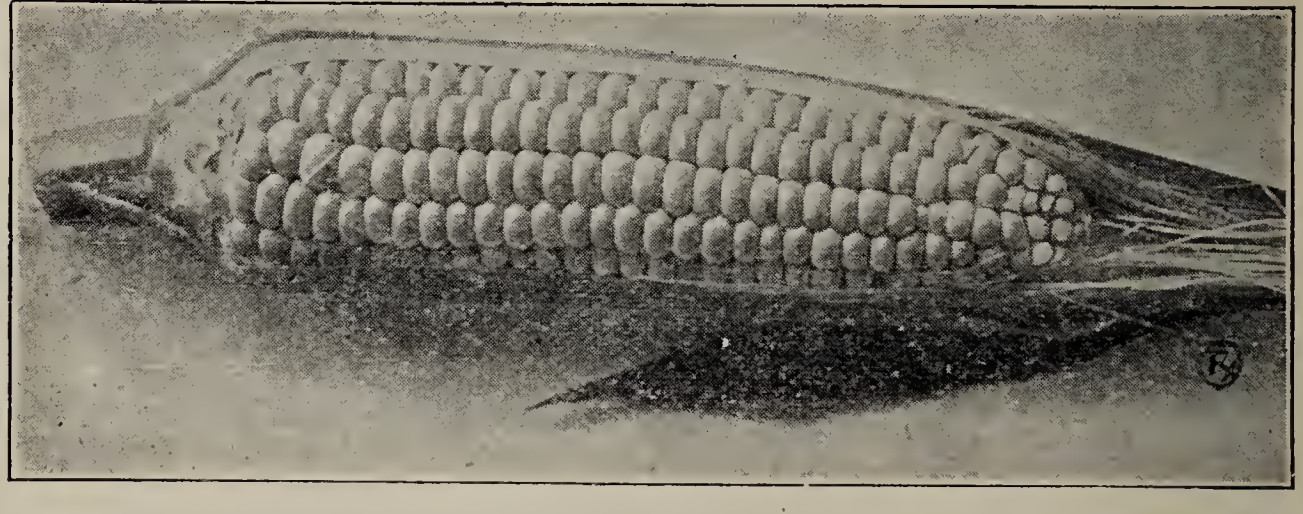
Golden Sunshine Sweet Corn
An Early Golden Bantam



Sunshine is ready for market a week to ten days before Golden Bantam. In fact, will be off the market before that variety is ready. The plant growth is dwarf and the ears closer to the ground. The ears are the same size as Bantam but 12-rowed instead of 8, of equally good color and with a high quality grain.

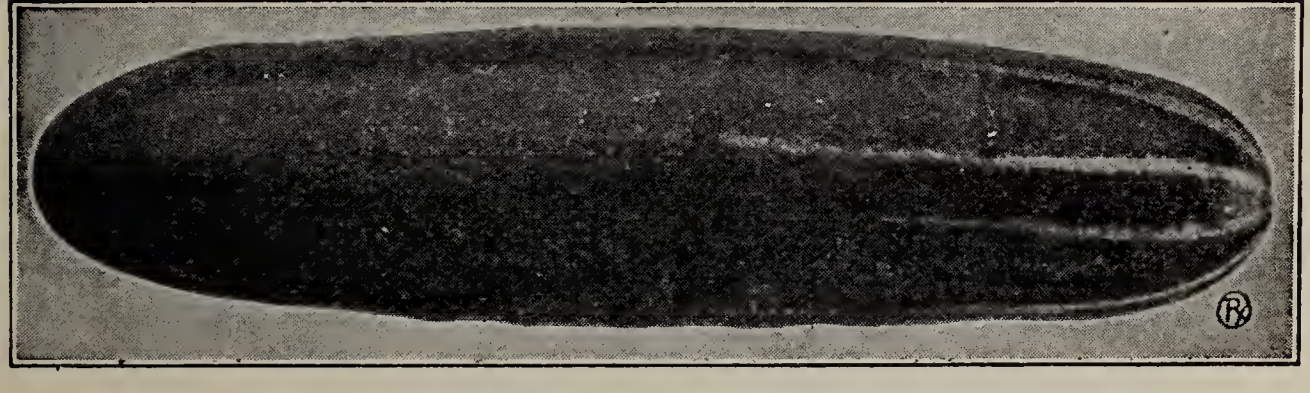
CUCUMBER



Our Wonderful

OUR WONDERFUL—Beautiful in appearance, of dark bluish green color. Suitable for both the garden and forcing. A healthy, productive and fairly early variety, the fruits averaging 14 inches in length by 2½ inches in diameter and are very symmetrical. An ideal Cucumber for the market grower and greenhouse man as a "straight pack" variety for shipment boxed and wrapped in paper, to markets, demanding top notch products where price is no object. The seed we offer is of the highest quality saved only from well developed straight and perfect fruits. Whether you wish to grow it in the open or under glass, rest assured that our seeds are the best money can buy.

RADISH

BRIGHT SCARLET GLOBE, SPECIAL GREENHOUSE STOCK (Transplanted Stock)—We have offered a Special Greenhouse Stock of Scarlet Globe Radish a few years ago which has made many friends. Last year we offered an improved stock of this type. In addition to an earlier maturity, this strain is much improved in color, which is a rich brilliant scarlet, approaching the Saxa color. Its main advantage is **the unsurpassed quality.** Crisp as no other radish, thin-skinned and **much longer standing** before becoming pithy. This improved strain is one of our new introductions of "Quality Radishes."

RADISH

SCARLET GLOBE, No. 2, SPECIAL OUTDOOR STRAIN (with more top) (Transplanted Stock)—The past few years we have had an increasing demand, especially from growers of the Norfolk, Va., section, for a Scarlet Globe Radish which will produce somewhat larger tops than our regular Reselected Scarlet Globe. It sometimes occurs that the tops of the latter variety when sown outside remain too short so that they do not bunch well. This demand has prompted us to select a strain with somewhat larger tops and we are glad to be able to offer it to the trade now. This radish differs from our Reselected strain only in the length of tops, as for the rest it is quite as perfect in every respect. It is unsurpassed for outdoors truckers' work.

CRIMSON GIANT — A nearly globe-shaped Radish, very large, and remaining in good condition a remarkably long time for a mid-season variety. Skin is fine crimson, and flesh pure white and of excellent quality. It matures very quickly and is tender and crisp. A fine sort for open-ground successive sowing.

RESELECTED SCARLET GLOBE, Standard Type, No. 1—Grown from carefully selected transplanted roots. A perfect strain, result of individual plant selection. Surprisingly uniform, color brightest scarlet, shape perfect, well-rounded bottom, with thin tap-root. Tops are of medium size and uniform. Flesh pure white, crisp and of fine flavor. It remains very long in prime condition. Fine for market.

ICICLE MUCK-SOIL STRAIN—This is a very highly selected strain and excels all others we have ever observed. The roots are remarkably uniform and perfectly shaped. The tops in this strain are short and compact but when grown on muck soil they reach just the ideal size for easy bunching and basketing.

Queen of the North—Snowy white.....**Pkt., 10c; ⅛ oz., 25c**
Canary Bird—Canary yellow.....**Pkt., 10c; ⅛ oz., 30c; oz., $1.00**
All Colors Mixed.....**Pkt., 10c; ⅛ oz., 25c**

AQUILEGIA (Columbine)

Double Mixed, Pkt., 10c; Single Mixed, Pkt., 10c

REALLY WILT RESISTANT ASTERS

These new strains are offered, after four years of practical tests, to those who have discontinued growing these profitable flowers because of failures from wilt in the past. They will succeed in badly infested wilt conditions where our regular strains will be lost entirely. They are almost completely immune to wilt.

Wilt resistant Branching Asters—Azure-blue, crimson, pink, shell-pink, purple, or mixed, rich dark red (the above colors only).
.....**Pkt., 10c; ¼ oz., 35c; oz., $1.00**
Queen of the Market.....**Pkt., 10c; ⅛ oz., 25c**
Mixed .....**Pkt., 10c; ⅛ oz., 25c**
Semples Giant Branching—Produce extra size blossoms of fine form on long stems. 2½ feet.

BALSAM APPLE—Pkt., 10c

- Red Riding Hood ..... Pkt., 10c; ½ oz., 40c

The Simplest, Most Effective and Easiest to Operate DUSTER on the Market

No. 200 D and B Duster

Hopper holds about 7 lbs. of spraying powder.

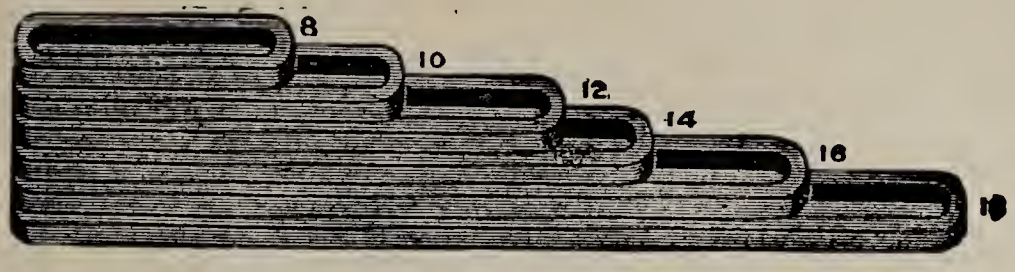
Price $12.00

THE No. 200 D&B DUSTER is best suited for low-growing crops such as Potatoes, Tomatoes, Cabbage, Berries, Melons, Tobacco, Cotton, etc. It can also be used effectively on shrubs and small trees. Hopper holds about 7 lbs. of spraying powder.

SIMPLE AND EASY TO OPERATE — Without doubt this is the most simple and easy operating duster of its kind on the market. Light in weight, well balanced and supported over shoulder by heavy web strap. Made of very few parts and there is nothing to get out of order. Dial indicator with graduating figures makes possible quick and accurate adjustment for regulating flow of powder from hopper. It is possible for operator to set the indicator for any definite amount of dust desired. This eliminates guess work in controlling density of the dust cloud. Distributes the dust uniformly. The powerful air blast produced by the fan breaks up the powder into a fine dust cloud, instantly covering all parts of the plant. The agitator and feeding mechanism are made strong enough to break up all hard lumps of powder without injury to any parts of the Duster. Comes complete with attachments for dusting one or two rows. Elbows, pipes and wide spreading nozzles can be adjusted to direct dust cloud in many directions. **Price $12.00.**

No. 100—Construction and operation same as No. 200 described above. **Price $9.00.**

RUBBER BANDS



New Rubber Bands (gray in 1-lb. boxes) cheaper and far more handy than twine for asparagus, onions, radishes and other bunching varieties. The number 8 count about 7,000 to pound, the larger sizes a trifle less count per pound. **We can supply the following sizes: Nos. 8, 9, 10, 11, 12, 14 and 16. Price 60c per lb. Prepaid.**

RHUBARB

NEW! NEW! ROYAL RUBY— Something you have been looking for. Of Canadian origin, a truly red Rhubarb. Red from top of ground to beginning of leaf, cuts red or dark pink throughout leaf stalk. Ruby Rhubarb is not as large as the old type Victoria, but the average length of leaf stalk is 30", width about 1" and ½" thick.

In every sense of the word, it is positively known that no Rhubarb runs 100 per cent true from seed, but our observation that Royal Ruby seed will produce nearly 95 per cent true type. Merely plant the seed in the spring, in fall cut out few green or off types and you have a perfect field for transplanting and your foundation for a crop of perfect rhubarb is built The extremely hot season of 1934 and 1935 killed many fields of rhubarb necessitating a rebuilding of their fields and why return to old half green variety? Why not give your customers what they want? They want a red Rhubarb The texture is fine, free from fibre, tender and juicy with an unexcelled flavor. The surface is smooth, medium thick and the flesh is pink to deep red.
